

# Team Telomere

## GALA CELEBRATION SPONSORSHIP OPPORTUNITIES

Telomere Biology Disorders (TBDs) encompass a group of rare genetic conditions characterized by very short telomeres. This telomere shortening can manifest in a diverse array of clinical symptoms, ranging from isolated conditions like bone marrow failure to multiple, concurrent health issues. The severity and presentation of these symptoms can vary significantly among individuals, often leading to potentially life-threatening complications.

Team Telomere leads the way in education, advocacy, and research for those impacted by TBDs. Our vision is to see a world where every person impacted by Telomere Biology Disorders – including the affected individuals, caregivers, researchers, and clinicians – has accessible care, community, and resources, with the goal of positively changing the course of this disease, driving toward improved treatments and ultimately, one day, a cure.

## Boots and Genes

Every year, Team Telomere hosts an annual gala in celebration of the Telomere Biology Disorder community. This celebration brings together all parts of our community and is filled with joy and inspiration to build brighter futures.

**Boots and Genes** is Team Telomere's fourth annual gala celebration. We invite you to support this unforgettable evening celebrating the advancements and accomplishments of all parts of our community including impacted individuals, families, advocates, clinicians, and researchers.

**July 10th, 2024**

The Chinook Meadow Ceremony, Idaho
